1. Важно: Помните об опасности открытого огня и других источников сильного тепла, таких как электрические и газовые плиты и т.д. в непосредственной близости от кровати.
2. Важно: Не используйте кровать, если некоторые из деталей повреждены или отсутствуют, всегда используйте запасные части, предоставленные производителем.
3. Важно: Не оставляйте никакие предметы в кровати и рядом с ней, которые могут служить опорой для ног ребенка или представлять опасность удушья ребенка, например, веревки, шнуры от занавесок, жалюзи и т.д.
4. Важно: Не используйте более одного матраса в кровати.
5. Кровать можно пользоваться только после того, как запорные механизмы установлены и тщательно проверена их надежная работа.
6. Если высота ложа кровати поддается регулировке, самая нижняя позиция является самой безопасной, и эту позицию необходимо использовать, когда ребенок достаточно вырос, чтобы самостоятельно сидеть.
7. Толщина матраса должна быть такой, чтобы внутренняя высота (от поверхности матраса до края кровати) составляла не менее 500 мм в нижнем положении ложа кровати и не менее 200 мм в верхнем положении ложа кровати.
8. Минимальный размер матраса для кровати должен быть от 88 см в длину до 48 см в ширину. Размер матраса должен быть такой, чтобы зазор между матрасом и сторонами кровати не превышал 30 мм.
9. Инструкция по чистке: Для чистки, пожалуйста, используйте влажную и мягкую ткань.

Несоблюдение этого требования может повлечь травмы и порезы у ребёнка либо допустить возможность контакта крепёжных деталей с одеждой и аксессуарами (шнуры, цепочки, крепления для сосок и т.д.), что повышает опасность удушья.
12. Все собранные механизмы должны быть правильно закреплены, отрегулированы, регулярно проверяться и корректироваться при необходимости.
13. Если ребенок остался без присмотра, убедитесь, что съемная сторона включена. В этом случае должны быть на месте 4 стороны.

- Важно: Помните об опасности открытого огня и других источников сильного тепла, таких как электрические и газовые плиты и т.д. в непосредственной близости от кровати.
- Важно: Не используйте кровать, если некоторые из деталей повреждены или отсутствуют, всегда используйте запасные части, предоставленные производителем.
- Важно: Не оставляйте никакие предметы в кровати и рядом с ней, которые могут служить опорой для ног ребенка или представлять опасность удушья ребенка, например, веревки, шнуры от занавесок, жалюзи и т.д.
- Важно: Не используйте более одного матраса в кровати.
- Кроватью можно пользоваться только после того, как запорные механизмы установлены и тщательно проверена их надежная работа.
- Если высота ложа кровати поддается регулировке, самая нижняя позиция является самой безопасной, и эту позицию необходимо использовать, когда ребенок достаточно вырос, чтобы самостоятельно сидеть.
- Толщина матраса должна быть такой, чтобы внутренняя высота (от поверхности матраса до края кровати)составляла не менее 500 мм в нижнем положении ложа кровати и не менее 200 мм в верхнем положении ложа кровати.
- Минимальный размер матраса для использования в большой мини-кроватьке составляет от 88 см в длину до 68 см в ширину, а в кровати – от 138 см в длину до 68 см в ширину. Длина и ширина должны быть такими, чтобы зазор между матрасом и боковинами и изголовьем не превышал 30 мм.
- Инструкция по чистке: Для чистки, пожалуйста, используйте влажную и мягкую ткань.
- Для предотвращения риска выпадения ребенка из кровати и получения травмы, когда ребенок может вылезти из кровати самостоятельно, не используйте больше кровать для этого ребенка.
- При монтаже все детали должны быть правильно закреплены, а винты тщательно затянуты. Несоблюдение этого требования может повлечь травмы и порезы у ребёнка либо допустить возможность контакта крепёжных деталей с одеждой и аксессуарами (шнуры, цепочки, крепления для сосок и т.д.), что повышает опасность удушья.
- Все собранные механизмы должны быть правильно закреплены, отрегулированы, регулярно проверяться и корректироваться при необходимости.
